Art Unit: 2825

Reasons for Allowance

The following is an examiner's statement of reasons for allowance:

Claims 1-19 are allowed because the prior art does not teach or suggest a method/apparatus/article for generating a pipelined synchronized circuit representation of a program loop; the method having a dependence graph that represents operations and registers and connections and generated from a program loop; until a scheduled graph is successfully generated, repeated attempts are made to generate a scheduled graph from operations and registers of the dependence graph using a minimum clock period and initiation interval that are determined from the dependence graph. With each failed attempt to generate a scheduled graph, the minimum clock period is increased prior to the next attempt to generate a scheduled graph.

This invention relates to mapping software program loops to a hardware implementation

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance".
